

A scatter plot showing the relationship between Component 1 (X-axis) and Component 2 (Y-axis) for the variable 'number'. The X-axis ranges from -5.6 to -5.0, and the Y-axis ranges from -0.05 to 0.05. The data points are green circles. There is a general trend where higher values of Component 2 correspond to higher values of Component 1, with some scatter.

A scatter plot showing the relationship between Component 1 (x-axis) and Component 2 (y-axis) for the variable D 3. The x-axis ranges from -0.1 to 0.5, and the y-axis ranges from -0.3 to 0.3. The data points are represented by red stars and are tightly clustered along the y-axis, indicating a strong correlation with Component 2 and minimal variation in Component 1.
