

A

Measure fitness of mutants
across environments

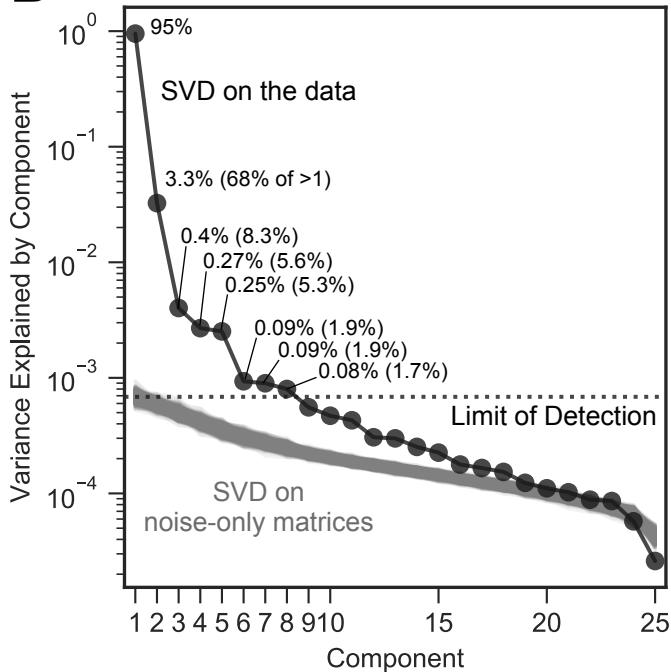

Infer mutant phenotypes and environment weights
from fitness profiles using SVD

$$f_{M_3 E_2} = p_{31}e_{12} + p_{32}e_{22} + \dots + p_{3k}e_{k2}$$

$$f_{M_4 E_3} = p_{41}e_{13} + p_{42}e_{23} + \dots + p_{4k}e_{k3}$$

Linear model of phenotype to fitness

B**C**
