

A scatter plot showing the relationship between Measured Fitness (x-axis) and Predicted Fitness (y-axis). The x-axis ranges from -6 to 0, and the y-axis ranges from -6 to 0. A dashed diagonal line represents the identity line (y = x). Data points are colored by group: blue, orange, light blue, grey, purple, green, pink, and black. Most points are clustered near the identity line, particularly in the upper right quadrant (high fitness values).

## Predicted Fitness
